# COVID Q & A

Source: City of Milwaukee Health Department

**Question:** *Is there a shortage of the COVID-19 vaccine?*

**Answer:** Yes. According to the City of Milwaukee Health Department, there are not enough vaccines being distributed to meet the current demand. Appointments to receive the vaccines that are available fill up quickly. Officials encourage individuals 65+ and others currently eligible to check for openings regularly with the Health Department, pharmacies and through your health providers.

MARCH 15TH - MARCH 21ST

**\*Keep an eye out for agency activities to follow!\***

# After You Get the Vaccine

## What to Do

- **Make a plan to get your second dose of the vaccine (Most COVID-19 vaccines will require 2 doses - Moderna: 28 days after the first dose & Pfizer: 21 days after the first dose).**
- **Find a safe place to keep your COVID-19 vaccination card.**
- **Know the common side effects (Fever, chills, tiredness, headaches, or pain or swelling on your arm where you got the vaccine).**
- **Know when to call a health care provider (Redness or tenderness increases after 24 hours, and/or if your side effects worry you or if they last longer than a few days).**
